

Information in Bloom Management Services

IM Landscaping

Information Management and Data Management Services when you need them

Information in Bloom Management Services offers a strategic approach to information by organizing the search, collection, sharing, evaluation, storage and removal of data & documents. For established businesses with enterprising teams, the IM Landscaping service package is intended to enhance your business's information environment and facilitate corporate growth in this ever-changing intelligence marketplace.

Using best practices, policies, resource mapping, technology training and consultation, IM Landscaping delivers plans that help improve efficiency while increasing the value of information holdings. By engaging an information professional to support your staff and IT team, you can evaluate gaps in your processes, boost accountability for stakeholders, improve information & data quality and save costs.

- ❖ **Consultation & Development of corporate information & data management strategy**
- ❖ **Visualized Intelligence**
- ❖ **Missing something? Set up information minimums and proactive processes for your data entry**
- ❖ **Have trust in your system with higher data quality & security**
- ❖ **Establish your information's lifecycle**
- ❖ **Organized information architecture, making it easier for staff to find what they need**
